Depco Commemorates Two Decades in the Power Industry

HOUSTON – February 8, 2011 – In 1991, Depco Power Systems opened its facilities to the public with the singular vision of providing quality power equipment at fair prices. Twenty years later, Depco continues to be the premier supplier and buyer of power generation equipment in the industry.

“Depco is proud to celebrate twenty years in business,” said Dick Davis, president of Depco Power Systems. “We are extremely thankful for our supporters and customers who have made this milestone possible.”

Known for a steadfast commitment to customer satisfaction and quality assurance procedures, Davis also cited industry innovation as a key component in the company’s success. Depco’s real-time online inventory, featured on its recently launched website, is a first for the power industry.

Originally Diesel Engine and Parts Company, the company underwent more than just a name change in twenty years. Depco has experienced exponential growth, extending its reach from hometown Houston to a worldwide market. Sales representatives have travelled to more than 150 different countries, providing power to a broad range of clients.

Depco Power Systems is the leading, independent provider of new, used and rebuilt power generation equipment. Serving clients worldwide, Depco’s core inventory includes a wide variety of diesel generators and engines, natural gas generators and engines, marine engines and transmissions, power units and transfer switches. For more information, please visit www.depco.com.
